## GATHERING OF THE TEXTILE ARTS

### WEAVING THE PAST, PRESENT, & FUTURE

**Please answer the following questions in 400 words or less:**

1. Do you have experience organizing large events, such as conferences, fieldtrips for large groups, etc.? Please explain.
2. Have you worked in a country other than the USA before? If you have, what have you learned from this experience? If you haven't, what are your expectations?

**Please translate the following texts from Spanish to English, or from English to Spanish**

1. Some of the ancient cultures most noted for their advancement of the textile art are the Chavín, Paracas, Nazca, Chimú, Chancay and Wari cultures. The Paracas culture flourished from roughly 800 to 100 BC on the dry southern coast of Peru. Our knowledge of their culture stems from the burials that archeologists, and grave robbers, uncovered on the Paracas Peninsula. Paracas rulers and nobility were buried in conically shaped funerary bundles made out of layers and layers of remarkable textiles. The Paracas weavers are recognized for the varied and complex range of weaving structures and techniques they developed, one of which is the discontinuous warp and weft technique which is particularly challenging and impressive. The Paracas are especially well known for their use of brightly colored embroidery on plain-weave.
2. Tradicionalmente, las niñas comienzan a aprender lo básico del tejido alrededor de los 5 años. Las niñas aprenden observando como sus parientes hilan y tejen para después intentarlo ellas mismas cuando pastean los rebaños familiares. Con muchas horas de práctica en el campo, las niñas aprenden todos los diseños simples y comienzan su aprendizaje de diseños y técnicas más complicados. Los primeros tejidos que una joven aprende son las *jakimas*, o pequeños lazos. Aquí usted aprenderá a tejer *jakimas* con los mismos diseños que una niña aprende al empezar su camino a convertirse en una tejedora experta. Mediante estos diseños, usted aprenderá todos los conocimientos básicos del tejido de cintura que necesitara para poder aprender a tejer diseños y técnicas más complicados en el futuro.
